## **Energy Management**

Energy management is necessary in order for the District to minimize the impact energy cost increases will have on the budget, maintain a reliable supply of energy to meet the functional needs of the District, and ensure that energy is used efficiently.

A strong commitment on the part of the Board and the Administration is important to an effective energy management program. It shall be the responsibility of each District employee and student to actively participate in conservation efforts in order to reduce consumption to levels prescribed by state, federal and local rules.
