Learn about industry-recognized certifications and even earn them during this training

INDUSTRY 4.0 INSTRUCTOR TRAINING

Take your program to the next level with this summer professional development course

JUNE 19-23

8:00AM to 4:00PM

Do you want to become a part of closing the skills gap in manufacturing? Want to prepare your students for high-wage, high-demand careers? Or just want to learn what Industry 4.0 is all about?

Over 350 instructors across the Midwest have attended this week-long training program designed to help educators deliver Industry 4.0 courses in their program.

We'll cover key topics, along with hands-on training, around mechatronics, industrial controls, robotics, the Industrial Internet of Things (IIoT), and a variety of other technologies like AI, data analytics, AMRs and more.

**Chippewa Valley
Technical College**
