River Valley Stormwater Drainage Project
River Valley School District - Spring Green, WI

Sealed bids are requested for the River Valley Stormwater Drainage Project. The work includes, but is not limited to the following:

Base Bid - Install a storm sewer to connect the foundation drain discharge pipe on the south side of the Middle School to the village storm sewer and extend a new storm sewer along the driveway (Daley Street extended) to the field between the Middle School and Elementary School. Work includes but is not limited to 1,310 CY of common excavation, 800 LF of 3"-8" Sch 40 PVC drainpipe, 660 LF of 12" HDPE storm sewer, 236 SF concrete sidewalk replacement, 240 tons of asphalt.

Alternate Bid Item 1 – Install a roof drain lateral on the north side of the High School to connect all downspouts and regrade the area north of north parking lot and driveway to improve drainage from the edge of pavement to the existing ponds. Work includes but is not limited to 400 CY of common excavation, and 220 LF of 8" Sch 40 PVC.

Alternate Bid Item 2 – Install an infiltration device in the low-lying area of the field just south of the Middle School basketball court. Work includes but is not limited to approximately 110 CY of common excavation, 110 CY of 3" clear stone, and 1,040 SF of geotextile fabric.

Alternate Bid Item 3 – Connect the downspouts on the north side of the Middle School and install trench drains across the sidewalks to carry roof runoff from the downspouts to the curb of the parking lots/driveways. Work includes but is not limited to 100 LF of 4" trench drain, 940 SF of concrete sidewalk replacement, and 63 LF of Sch 40 PVC.

Alternate Bid Item 4 – Install two infiltration devices southeast of the Elementary School playground pavement. Work includes but is not limited to approximately 1,000 CY of common excavation, 640 CY of 3" clear stone, and 3,500 SF of geotextile fabric.

Alternate Bid Item 5 – Install drain tile behind the softball field backstop. Connect to the existing drainpipe and run it to the drainage channel to the west. Work includes but is not limited to 155 LF of 6" drain tile and surface restoration.

Bids will be received at the office of Jewell Associates Engineers, 560 Sunrise Drive, Spring Green, WI 53588 until 2:00 P.M. local time, March 18, 2021, and then at said office publicly opened and read aloud.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions.

2. It is essential to ensure that all entries are supported by appropriate documentation and receipts.

3. Regular audits should be conducted to verify the accuracy of the records and to identify any discrepancies.

4. The second part of the document outlines the procedures for handling cash and credit transactions.

5. Cash transactions should be recorded immediately and the cash should be deposited in a secure bank account.

6. Credit transactions should be recorded as soon as the invoice is issued, and the amount should be tracked until payment is received.

7. The third part of the document provides guidelines for managing accounts payable and receivable.

8. Accounts payable should be paid on time to maintain good relationships with suppliers and to avoid penalties.

9. Accounts receivable should be collected promptly to ensure the company's cash flow remains healthy.

10. The final part of the document discusses the importance of maintaining accurate financial statements.

11. These statements provide a clear picture of the company's financial performance and are essential for decision-making.

12. It is crucial to review these statements regularly and to consult with a professional accountant if needed.

13. The document concludes by emphasizing the need for transparency and accountability in all financial activities.

14. By following these guidelines, the company can ensure that its financial records are accurate and reliable.
